

**No mixing!**  
**No pouring!**  
**No mess!**

**COLOURS AVAILABLE:**

# **Impact** **XP**

■ **Ready to use:**

**Impact XP** is the most advanced, ready to use line marking paint available. It has been formulated using a high titanium content, for increased whiteness and durability.

**Impact XP** does not lose its characteristic brightness during wet conditions. It requires no mixing or pouring, but is applied direct from its container, without the addition of water.

■ **Impact XP:**

**Impact XP** is an environmentally friendly paint, formulated for use on grass sports and playing fields. The paint was developed with the iGO spray machine, to give consistent, bright white, and coloured markings. Dependent on the needs of the job, it can be applied using any of the four Impact cone nozzles.

Using cone nozzles allows you to over mark a standard soccer pitch from as little as 1.1ltrs of paint. With the appropriate nozzle, 1.5ltrs of paint will overmark, to a sports club standard.

**Impact XP** gives superior leaf coverage ensuring a clean, crisp line, time after time.

**Impact XP** is supplied in white, HDPE grade, stackable, UN containers. Caps are colour coded to reflect the paint colour.

1 x 10ltr container  
can over mark up to  
6 pitches
